

Peter Feddo Senior Full-Stack Drupal Developer

I build scalable web applications that bridge legacy systems and modern front-end frameworks.

Senior Full-Stack Drupal Developer

GSATi | 2012 - 2025 Dallas, Texas / Remote

- Led development of scalable direct-to-consumer e-commerce platforms using Drupal Commerce, supporting complex sales models for large consumer brands.
- Pioneered the organization's shift to decoupled architecture by designing and building an Angular-based RESTful e-commerce dashboard and reporting suite.
- Architected and developed a decoupled Angular application for managing complex recurring subscription workflows on Drupal Commerce.
- Built a reusable suite of Drupal Commerce API services enabling flexible cart structures (single, bundled, and subscription-based products) across multiple applications.
- Architected end-to-end commerce infrastructure for one-time and recurring subscription products, integrating Drupal backend services with Angular frontend applications.

Full-stack Developer - Johns Hopkins ViewHub Project

Graphicacy | 2022 - 2025 Contract / Remote

- Engineered scalable data ingestion and transformation pipelines in Drupal (PHP) to process large-scale scientific datasets.
- Designed API-driven Drupal modules exposing normalized research data to decoupled Angular applications.
- Contributed to advanced, data-driven visualization interfaces enabling medical researchers to explore

Languages & Frameworks

- PHP
- Javascript
- Typescript
- React
- Angular
- Vue
- Astro
- Gatsby
- Next.js
- SQL
- CSS (SASS, Tailwind, Bootstrap)

Technical Skills & Software

- Drupal (Theming & Module Development)
- Wordpress (Theming & Plugin Development)
- Magento/Adobe Commerce
- WCAG Accessibility

Cloud Ecosystems

- AWS
- Google Cloud
- Netlify
- Pantheon
- Platform.sh / Upsun

complex datasets.

- Worked within a hybrid decoupled architecture bridging structured backend systems with interactive frontend applications.
- Collaborated cross-functionally with scientists and designers.

Full-stack Drupal Developer & Senior Drupal Commerce Developer

Kanopi Studios | 2014 - 2017 Contract / Remote

- Implemented full-stack Drupal Commerce solutions by translating complex design systems and technical specifications into production-ready themes and custom modules.
- Engineered recurring billing workflows within Drupal Commerce, integrating external APIs to support subscription lifecycle management.
- Developed PHP-based inventory synchronization tools to maintain product consistency between Drupal Commerce storefronts and Amazon marketplaces.

Full-stack Drupal Developer

North Studio | 2012 - 2017 Contract / Remote

- Built and launched Drupal Commerce websites, converting design frameworks and architectural specifications into high-performing production systems.
- Led Drupal upgrades and migration efforts, improving platform security, maintainability, and long-term scalability.
- Implemented responsive, accessibility-first Drupal themes aligned with WCAG standards and best practices.

Testing & CI

- Jest
- PHPUnit
- Playwright
- Github Actions

Tools & Services

- Git
- DDEV & Lando
- Docker
- Gemini
- Microsoft Copilot

Education

Virginia Commonwealth University School of Business

Information Systems, Political Science
2001-2004

- Provided direct client consultation, training, and documentation to ensure successful CMS adoption and long-term platform sustainability.

Online Campaigns Manager & Drupal Developer

NGP VAN | 2005 - 2012 Contract / Remote

- Designed and delivered high-impact digital campaign platforms powered by Drupal for dozens of local, congressional, senatorial, and gubernatorial candidates nationwide.
- Built geospatial web applications that rendered campaign districts and integrated multi-source data overlays for interactive map-based analysis.
- Partnered remotely with campaign teams to architect data-driven social and digital strategies in fast-paced election cycles.
- Launched a Drupal-based SaaS platform that enabled the company to scale operations and quadruple support for small and mid-sized campaigns.
- Created product documentation, onboarding systems, and support workflows for a turnkey campaign website offering.

Awards

- Golden Dot Award — George Washington University Institute for Politics Democracy and the Internet
- Reed Award — Campaigns & Elections Magazine
